2009 to Present **McKinzie & Associates** **Olathe, Kansas 66061**
Policy Statement

McKinzie & Associates is dedicated to providing an accurate technical analysis of motor vehicle collisions, based on creditable data. The most modern techniques in accident reconstruction; Total Station Forensic Mapping, Laser Scanning, Aerial mapping, computer aided drafting, Virtual Crash simulations, Rectec, VC4000DA-DX dynamometer data acquisition performance computer, Stalker Radar, Performance Time Traps and the Gooch C.V. Brake analyzer are utilized to document evidence and substantiate the case. Finally, a professional courtroom presentation can include simple to understand analysis of the collision and reconstruction process, color scale drawings, or real time animation.

Investigated / Reconstructed over 1620 traffic collisions as of January 2024
